Bring up the Virtual Box program by going to Start > All Programs > Start > Programs > VMware > VMware Player. Open the file to the Data field. For details, see Virtual Box Folder Options. Jan 23, 2019 The solution is to use 32 bit versions of Virtual Box. Since the standard version of Virtual Box on 64 bit Windows is the "older" VirtualBox the solution is to use the 32 bit version of Virtual Box, which is free and fully supported. Windows XP OVA Virtualbox Image to run in virtualbox Windows XP OVA Virtualbox Image. Microsoft provides several versions of the Internet Explorer, named Internet Explorer 1, 2, 3, and 5 to 10. The Microsoft Internet Explorer 6, and 7, are proprietary web browsers Microsoft Windows. It is a graphically based, personal web-browser for the Windows family of operating systems. It is successor of the Microsoft Internet Explorer 5.5 and it is the current primary web-browser for Microsoft Windows. Images From Wikipedia. Wikipedia has media related to Microsoft Windows on Wikidata. Microsoft Windows is a general-purpose operating system developed, marketed, and sold by Microsoft. It was first released in October 1991 for the Intel x86 family of microprocessors. As of May 2016, Windows 8.1 is the latest release of Windows, for personal computers based on x86 processors. Windows 8 was the first edition of Windows. Open up Visual. Open the folder where you placed the Windows XP OVA virtual image (in our case "D:\Programming\XP PDEpt\Visual Studio 2017 Projects\Taxi Rush") on the host PC. There you will see the hdimage file which was copied with your image file. There are 2 options for you to use the image file. Either make a new virtual hard disk or you can mount the existing virtual hard disk. You can always delete the file after you're done with it. TaxiRush.vbox I saved this to a temporary location. Open the "TaxiRush.vbox" file and drag and drop the image you saved to the virtual machine window in VirtualBox. The guest operating system will install and boot immediately. Open up the laptop you are using to access the VirtualBox image of Windows XP. Navigate to your temp folder and locate the file "TaxiRush.vbox". You will see the file has 2 major files. This is the virtual image of Windows XP. Open the
